BIKE TRAILS

UNLOCK THE POTENTIAL OF YOUR TERRAIN

ALLIANCE - THIS IS US

Action Sports Experts from the Alps, implementing outstanding sports infrastructure Worldwide.

Alliance refers to a partnership or collaboration formed between individuals or groups who share a common goal or interest. In the case of the Alliance ASE, the alliance is made up of athletes and professionals from various fields who are passionate about action sports and creating high-quality facilities. We work together to design, build, and implement action sports infrastructure.

Alliance ASE is a full-service design and construction company specializing in action sports facilities and outdoor tourism development. Since 2007, our team has helped over 280 destinations, communities, and private investors worldwide to build mountain bike trails, skateparks, snow parks, pump tracks, skills parks, and urban parks. Our facilities help to activate local communities and promote outdoor tourism.

WE BRING ACTION TO YOUR COMMUNITY

WHY MOUNTAIN BIKING?

Mountain biking tourism is booming, offering significant economic benefits and attracting riders from around the globe. Visitors spend money on lodging, dining, and other services, boosting local economies and creating jobs. MTB trails complement existing attractions like ski resorts, extending the tourism season and drawing in diverse demographics.

Well-planned trails are built with minimal environmental impact, promoting sustainable tourism. With riders traveling long distances and even overseas for quality MTB experiences, investing in trail development unlocks a powerful engine for economic growth and community well-being.

OUR APPROACH

At Alliance, we believe in a strategic and holistic approach to mountain bike trail development. We go beyond simply building trails; we create destinations that riders love and keep coming back to.

We prioritize community engagement, collaborating with local stakeholders to design trails that meet the needs of riders and the environment. Our commitment to quality construction and sustainable practices guarantees trails that are both thrilling and built to last, providing long-term value and enjoyment for riders and communities alike.

WHY CHOOSE OUR BIKE TRAILS?

We are a leading trail development company specializing in creating world-class mountain biking destinations. We transform your terrain into thriving recreation areas that attract riders, boost tourism, and benefit your community.

Unforgettable Experiences

We design trails that offer diverse and exhilarating riding experiences for all skill levels, from flowing beginner trails to challenging expert routes.

Sustainable Design

Our trails are built with minimal environmental impact, preserving the natural beauty of your landscape and ensuring long-term sustainability.

Community Focused

We actively engage with local communities to create trails that meet their needs and enhance their quality of life.

Built to Last

Our expert construction and meticulous attention to detail ensure durable and high-quality trails that require minimal maintenance.

OUR TRACK RECORD

We have successfully implemented mountain biking and pump track projects in various regions, always with a focus on enhancing tourism and creating accessible, safe, and enjoyable experiences for all users.

Our commitment to safety is reflected in our thorough risk assessments, and we work closely with local authorities and stakeholders to ensure that all safety protocols and regulations are strictly followed.

We're proud to bring the joy of riding to communities worldwide.

BIKE REPUBLIC SÖLDEN AUSTRIA

Project description:

At the Bike Republic Sölden bike park, we handled the ongoing annual maintenance of their mountain bike trails and also undertook the construction of new sections. Our work took us through diverse natural environments, from the predominantly rocky alpine areas to more soil-rich sections. We maintained and built trails of different kinds – flow and technical – and across all skill levels, employing both machine-based and manual construction methods.

Duration:

2017 - 2020

TURRACHER HÖHE AUSTRIA

Project description:

On the Turracher Höhe, we've built three new mountain bike trails: two red singletracks in 2024 and the upper part of the blue flow trail in 2019, using both machine and hand building techniques. This project was undertaken in collaboration with Allegra Trails GmbH.

Duration:

Jul - Okt 2019 and Jul - Aug 2023

BIKE PARK GALTÜR AUSTRIA

Project description:

In 2024, we teamed up with Allegra Trail GmbH to help build sections of a new trail in Galtür, Austria. One of our experienced machine operators worked on-site alongside Allegra's trail crew, contributing to the creation of a modern and sustainable trail experience. The collaboration brought together expertise and passion to further enhance the biking infrastructure in this alpine region.

Duration:

2024

MARIA ALM AUSTRIA

Project description:

In summer 2024, our handcrew was on site in Maria Alm, working under subcontract for Allegra Trails GmbH. Together with the Allegra trail crew, we built sections of a new MTB flowtrail, focusing on smooth lines, playful turns, and sustainable shaping. The finalization of the trail will be completed by Allegra in 2025. We're proud to have contributed to this project in the stunning setting of the Salzburg mountains!

2017, 2024

SPARKY'S BIKE PARK WILDSCHÖNAU AUSTRIA

Project description:

Drachental Family Park offers a wonderful bike park experience, featuring an uphill line and two trails. While perfect for kids and teenagers, adults will also enjoy the fun berms and rollers on the downhill sections. For added variety, a paved pump track is situated right next to the park.

Duration:

May - June 2021

SILVRETTA MONTAFON AUSTRIA

Project description:

This project was undertaken in collaboration with Allegra Trails GmbH. We took charge of building a section of a red singletrack, ensuring it included a rich variety of natural trail features alongside challenging technical elements.

2022

An aerial photograph of the MTB Skills Center in Vorchdorf, Austria. The image shows a pump track with several loops and a skill park area with various features. The surrounding area is lush green with trees and a large grassy field. The sky is bright and clear.

MTB SKILLS CENTER VORCHDORF AUSTRIA

Project description:

In 2022, we at Alliance ASE built the pump track in Vorchdorf and, in collaboration with the Naturfreunde Vorchdorf, developed the MTB Skill Park. The skill area features one uphill and multiple downhill lines, designed for playful progression and technical development. Especially popular with the MTB Kids for regular training sessions, the park offers low elevation but plenty of riding fun. Together with the pump track, it forms a versatile and dynamic setup – a valuable addition to the local mountain biking scene.

July – August 2022

ROADLBERG AUSTRIA

Project description:

In collaboration with MTB Linz, we at Alliance ASE built a flowtrail and an uphill flowtrail at Roadlberg in Upper Austria in 2025. A dedicated trail crew was on-site, consisting of one machine operator and one hand shaper, to bring the project to life. With passion and precision, we created a sustainable and high-quality trail experience – a new highlight for the local mountain biking community.

Spring - Summer 2025

BIKE PARK MARIBOR SLOVENIA

Project description:

Exciting additions to Bike Park Pohorje Maribor bring 4.5 km of new mountain bike trails to the region. Two of these trails are particularly significant as they introduce riding to the previously untouched Areh area. The third new trail is located within the bike park. Among these is a flow trail designed to be accessible for beginners while still providing an engaging experience for more advanced riders. The planning and construction of these trails were demanding, requiring the integration of many wooden bridges and crossings to navigate the steep, narrow landscape and existing infrastructure safely.

Duration:

2023, 2024

ROGLA SLOVENIA

Project description:

To cater to a range of riders, we've developed three different mountain bike trails in Rogla: a Flow Trail, an Enduro Trail, and a beginner trail. These trails were created through a combination of machine work and handcrafting, with a crucial focus on drainage to manage the area's erosion potential and lower, waterlogged sections. As the trails are situated within a Natura 2000 site, all construction activities were carried out in strict compliance with environmental protection measures.

Duration:

July - October 2023

DIRT PARK DIVJINA SLOVENIA

Project description:

Dirtpark Divjina, a project we completed, stands as one of the most popular dirt parks in Slovenia and wider region, reknowned by events such as Red Bull Wild Ride. Thanks to its countless, expertly shaped jumps, riders can enjoy limitless airtime.

2024, 2025

BIKE CENTER RABAC CROATIA

Project description:

The full realization of Bike Center Rabac's trail network was achieved in 2020, a result of dedicated hand labor combined with machine assistance. The rocky ground presented significant hurdles, but we successfully engineered a diverse selection of trails, ranging from gentle to highly technical. With a total length of 10 kilometers, the Bike Center now offers a comprehensive network for riders of all levels.

Duration:

2017 - 2020

A mountain biker wearing an orange shirt and a white helmet is riding a trail on a steep, rocky slope. The background features a vast, rugged mountain range with green valleys and rocky peaks under a clear sky. The text 'MAVROVO & PESHKOPI' and 'NORTH MACEDONIA & ALBANIA' is overlaid on the right side of the image.

MAVROVO & PESHKOPI

NORTH MACEDONIA & ALBANIA

Project description:

The “Next-level adventurous tourism in Mavrovo-Rostushe and Debar” project was a two-year EU initiative (2020-2022) fostering cross-border tourism between Albania and North Macedonia. Recognizing the economic potential of the scenic Mavrovo-Rostushe and Debar region, the project focused on developing high-quality mountain biking infrastructure. This involved creating a network of over 40 kilometers of trails, adapting existing routes and building new sections. Crucially, the project included training local individuals as skilled trail builders and certified mountain biking guides to ensure the sustainability and safety of this new tourism offering. A media study trip successfully generated international attention, with specialized agencies now poised to offer guided tours in the region.

Duration:

January – June 2022

BITOLA NORTH MACEDONIA

Project description:

Planning and construction of uphill and enduro trails in the North Macedonian MTB capital Bitola.

Duration:

August – October 2023

VODNO, SKOPJE NORTH MACEDONIA

Project description:

Master plan and implementation of uphill and
flow trails at the Tourist-Recreational Center
Vodno (TRC Vodno)

Duration:

November 2019 – October 2021

CAPE VULTURE RESORT SOUTH AFRICA

Project description:

Our pump track project in South Africa, located near Kruger National Park, aims to support sustainable ecotourism by offering accessible recreational opportunities. In addition to this, we have developed plans for mountain bike trails as part of the Sports & Leisure Park at Cape Vulture resort, which will expand the resort's recreational offerings. The integration of these facilities with the natural environment is intended to promote environmental awareness and responsible outdoor activities.

THE PATH TO YOUR NEW BIKE TRAILS

1 DREAM IT, RIDE IT

Got a vision for the ultimate flow line or jump line? We'll help you brainstorm, analyze the terrain, and visualize a ripper of a riding spot.

2 TRAIL ARCHITECTURE

We'll meticulously plan every berm, jump, drop, and technical feature to create a trail network that challenges and thrills riders of all levels.

3 DIRT SHAPING MASTERS

Our experienced trail builders will sculpt the perfect lines, ensuring smooth transitions, optimal flow, and a safe, high-quality riding experience.

4 ON-SITE TRAIL BOSSES

We'll be there every step of the way, managing the construction, ensuring precision, and keeping the project running smoothly.

5 SPREAD THE STROKE

Want to get the word out about your epic new trails? We've got marketing strategies to attract riders and build a thriving mountain bike community.

6 KEEP THE GOOD TIMES ROLLING

From grand openings to gnarly competitions and skills clinics, we'll help you organize events that keep riders engaged and the stoke level maxed out!

TAILORED TO YOUR NEEDS

Our goal is to craft the ultimate trail experience tailored to your riders, local terrain, budget, and any other shred-worthy features you envision. We'll design the perfect network for your chosen spot. Whether you're looking for a ready-to-roll turnkey setup or specific services, we've got you covered. From initial concept and full construction to launch events and getting the word out, we can handle every berm and switchback along the way.
